## ST JOHNS CHURCH ROAD IMPROVEMENT PROJECT GENERAL INFORMATION JULY 24, 2025

Welcome to the St Johns Church Road Improvement Project information meeting. This meeting presents the preliminary plans to widen and reconstruct St Johns Church Road between Richardson Road and Jeffco Boulevard to tie in to the MoDOT improvements currently under construction, approximately 0.33 mile.

In this open house format there will be no formal presentations. Exhibits at the meeting will show the proposed plan on aerial imagery, and representatives from the City and their engineering consultant, Great River Engineering are available to discuss the proposed improvements with you. Below are some key facts about the project:

### Where

The project is located along St Johns Church Road, commencing at Richardson Road and terminating just west of Jeffco Boulevard to tie in to the MoDOT improvements currently under construction, a distance of approximately 0.33 mile.

### What

- Widen driving lanes to 12 feet with curb and gutter
- Repave the roadway surface and improve roadside drainage
- Continuous sidewalks along both sides of the roadway
- ADA improvements and signal upgrades at Richardson Road
- Addition of Westbound-to-Northbound right-turn lane at Richardson Road
- Stormwater improvements
- Crosswalk improvements at St Johns Lutheran Church / School

### Why

The deteriorating pavement, narrow lanes, and absence of pedestrian facilities create safety issues for the traveling public. The addition of curb and gutter as well as improvements to roadside ditches will convey stormwater runoff in a more efficient manner. The proposed improvements will result in continuous sidewalks along both sides of the roadway, as well as ADA improvements and signal upgrades at Richardson Road, as well as the addition of a westbound right-turn lane, resulting in a smoother corridor that increases safety for vehicular traffic.

### When

The anticipated schedule for this project is to complete preliminary and right of way design this year. Right of way acquisition / negotiations are expected to begin next summer and construction is anticipated to commence early in 2029, but could occur sooner dependent on right of way acquisition.

Please send us your comments, your input is important to the City of Arnold!
