

The City of **Arnold** Missouri

ST JOHNS CHURCH ROAD IMPROVEMENTS **(Widening and reconstruction from Richardson Road to West of Jeffco Blvd)**

PUBLIC INFORMATION MEETING

July 24th, 2025 from 4:30 PM to 6:00 PM at
St Johns Lutheran Church, 3517 Jeffco Boulevard, Arnold, MO 63010

The city of Arnold is planning to improve St Johns Church Road from the intersection with Richardson Road to just west of Jeffco Boulevard, to tie in to the MoDOT intersection improvements currently under construction. You are invited to learn more about the proposed improvements at our Open House Information meeting at St Johns Lutheran Church. Over the last several months, our design consultant Great River Engineering, has been preparing a conceptual plan of the upgrades. We would like to provide the opportunity for residents along the roadway to view the plans and provide comments about the proposed improvements. There will be a two-week comment period (07/24/2025 – 08/07/2025) during which comments will be received. Comments may be submitted at the in-person meeting, or via mail or email to:

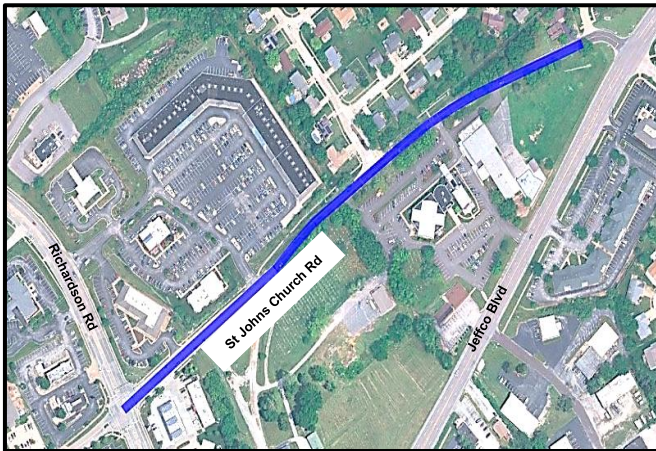

Ms. Judy Wagner, Project Engineer
City of Arnold Public Works
2900 Arnold Tenbrook Road
Arnold, MO 63010
JWagner@arnoldmo.org

OR

Mr. Jeff Banderet
Great River Engineering
2000 South Hanley Road
St. Louis, MO 63144
JBanderet@greatriv.com

This improvement is expected to include: widening to 12' wide lanes, the addition of curb and gutter, and repaving the existing roadway to provide safer travel and an improved driving surface. There will also be continuous sidewalks along both sides of the roadway, a new crosswalk with a Rectangular Rapid Flashing Beacon at the St Johns Lutheran School, as well as ADA improvements, the addition of a westbound-to-northbound right turn lane, and signal upgrades at Richardson Road. Drainage facilities along the corridor will also be improved to alleviate existing flooding concerns, particularly for properties along the north side.

ST JOHNS CHURCH ROAD IMPROVEMENT PROJECT

Key features of the proposed project are expected to include:
• Repaving the roadway surface and improving roadside drainage
• Widen driving lanes 12 feet and adding curb and gutter
• Continuous Sidewalks along both sides of the Roadway
• ADA improvements and signal upgrades at Richardson Road
• Addition of a Westbound-to-Northbound Right-Turn lane at Richardson Road
• Stormwater improvements

The project is funded by the City of Arnold, as well as a grant from the Federal Highway Administration (FHWA). Currently, the estimated \$2.4 million project is in the preliminary design stage. After this meeting, plans may be updated based on public feedback. Right of say acquisition / negotiations are expected to begin next summer and construction is anticipated to begin early 2029, but could be sooner dependent on right of way acquisition.

Comments received during the comment period (07/24/2025 to 08/07/2025) will be reviewed and incorporated into the plans where possible. For questions prior to the scheduled meeting, please feel free to contact **Ms. Judy Wagner, Project Engineer with the City of Arnold, at 636-282-2386 or JWagner@arnoldmo.org**, or **Mr. Jeff Banderet, Project Manager with Great River Engineering at 314-400-7677**.
